# LEA PESSEY-GIROD VICENTE

Madrid, Spain
(+34) 670 584 431 | lpesseygirod.ieu2025@student.ie.edu | LinkedIn | GitHub
Eligible to sign an internship agreement via IE University

## SUMMARY

Second-year Business Administration and Computer Science & AI student (GPA 8.78/10) with hands-on experience building AI products and the data behind them. Seeking to apply AI and automation to real business challenges.

## EDUCATION

**IE UNIVERSITY** — **Madrid, Spain**
**Dual Bachelor in Business Administration and Computer Science & Artificial Intelligence** — **Expected: July 2030**
- GPA: 8.78/10.00 (first year). Awarded Academic Excellence Scholarship
- Relevant subjects taken: Programming (Python, C), Cloud Computing (Azure), Probability & Statistics, Calculus

**UNED - UNIVERSIDAD NACIONAL DE EDUCACIÓN A DISTANCIA** — **Madrid, Spain**
**Dual Degree in Psychology and Criminology (distance learning, in parallel with IE)** — **2026 - Present**

**ESADE BUSINESS SCHOOL** — **Barcelona, Spain**
**Business & Entrepreneurship Programme: Honourable Mention (2nd place)** — **Summer 2024**

**BILINGUAL SCHOOL JEANNINE MANUEL** — **Lille, France**
**French International Baccalaureate (BFI) and American High School Diploma** — **Graduated: June 2025**

## EXPERIENCE

**SYLVIE -** ***Personal AI system running fully on-device (independent project)*** — **Madrid, Spain**
**Founder, AI and Data Developer (Python, MLX, Swift)** — **2026 - Present**
- Built a private AI system around a 27-billion-parameter open-source language model running entirely on a laptop (~25 tokens per second): voice in English, Spanish and French, memory that learns from corrections, web search, answers from personal documents with citations, and Calendar, Mail and Reminders actions.
- Designed the data pipeline: training sets from licensed sources only, personal data excluded, and 6 evaluation sets (maths, finance, languages, tools, general, style) that automatically reject any weaker version.
- Fine-tuned the model (LoRA/QLoRA) and built an overnight self-improvement loop where a second model grades answers and proposes better training data; diagnosed failed runs and shipped a version with no regressions.

**KORE -** ***AI companion for older people (independent project)*** — **Madrid, Spain**
**Founder and Developer (Python, Raspberry Pi)** — **2026 - Present**
- Developing a Spanish-speaking voice companion with a simple, friendly home screen: medication reminders, calendar and shopping list, weather and news, photos and messages with family, an emergency help button and a companion app for relatives. Safety-critical actions are handled by tested code, never by the AI alone.
- Developing KORE's own local language model (open-source) so conversations stay on the home's device, with no cost per answer and no dependence on external providers.

**STUDIPLY -** ***All-in-one AI study platform (independent project)*** — **Madrid, Spain**
**Founder and Developer (TypeScript, React Native, Supabase)** — **April 2026 - Present**
- Built an iPhone and web app, already in use, that records and transcribes lectures and turns them into AI summaries, flashcards and quizzes, with a study assistant.
- Includes a Google Docs-style editor (Word import/export, PDF export), spreadsheets with formulas and charts, and a Drive-style file library with folders, search and offline sync.

**IEU LABS -** ***Entrepreneurship Lab*** — **Madrid, Spain**
**Team Member, FitCheck** — **Summer 2026**
- Co-developed a fashion-discovery app concept with AI image search; led market research and validated the prototype with ~60 potential users.

## EXTRACURRICULAR ACTIVITIES

**IE University Class Representative:** Represented the class before faculty (Madrid, Spain. 2025 - 2026).
**Volunteer:** Race Against Hunger fundraising, World Clean-up Day and food banks (Lille, France and Mexico).
**Private lessons teaching** in Economics, Maths and English (2023 - Present).

## LANGUAGES

**Spanish** (Native). **French** (Native). **English** (Bilingual, IELTS Academic 7.5).

## ADDITIONAL INFORMATION

**Computer Skills:** Python (pandas), TypeScript, C, SQL, Swift; Git/GitHub, Supabase/PostgreSQL, SQLite, Docker, Microsoft Azure, Linux/Raspberry Pi, Power BI, Excel.
**AI and Data:** open-source language models (Qwen, Gemma) on MLX, LoRA/QLoRA fine-tuning, model evaluation, dataset building, Claude and OpenAI APIs, speech-to-text (Whisper), embeddings and vector search, CLIP.
**Certifications:** Microsoft Certified: Azure Fundamentals (AZ-900), November 2026.
**Interests:** IE competitive cheerleading, climbing (regional competitions), show jumping, dance (12+ years).
